

What Is New In VeraLab 6.1

July 2013

VeraLab 6.1 comes with only minor functional changes and bug fixes in comparison to previously released version 6.0.1. Most of the changes are related to new Menu UI and overall application Look & Feel.

List of Fixed Bugs and New Features

1. New Reports: **Usage Statistics Grouped by User and Tasks of Role.**
2. Improved performance in environments with large number of clients.
3. **Client Banners** and **Remote Client Update** functionality links (embedded into other tasks) transformed into standalone tasks.
4. Fixed bug: unable to delete alerts from Alert List.
5. Fixed bug: compatibility issues with IE9,IE10 in GWT tasks (Lab Schedules, Live Maps).
6. Fixed bug: deleted stations visible in remote client update task.
7. Fixed bug: fonts size in iPhone.
8. Fixed bug: profile link not showing for users with custom roles.
9. Fixed bug: unable to retrieve MAC address from clients with disabled NetBIOS.

OLD VERSIONS

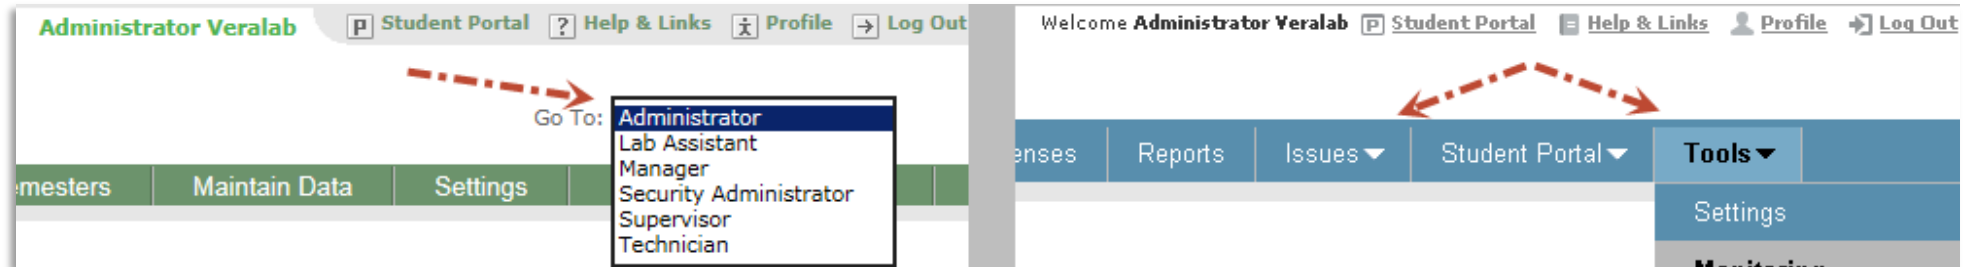

NEW VERSION 6.1

The image shows two side-by-side screenshots of a user management interface. The left screenshot is for 'OLD VERSIONS' and the right is for 'NEW VERSION 6.1'. Both show the 'Edit Employee Admin' form for a user named 'Admin'. The form fields are identical in both versions, including Username, First Name, Password, Email, Start Date, and Skillset. The 'Roles' section is highlighted with a red box in both. In the old version, the 'Security Administrator' role is selected as the primary role. In the new version, the 'License Administrator' role is selected as the primary role. Red dashed arrows point from the text 'Security Administrator Now License Administrator' to the respective role selections in both versions.

Field	Value	Field	Value
Employee type	Native	Employee type	Native
