

What is New in VeraLab 9.2.0

Release Date: 08-August-2024.

Enhancements and Updates

VeraLab version 9.2.0 comes with the following enhancements and fixes.

- New settings allowing to adjust to regional day of week and time formats. These settings appear under a new **Localization Settings** category.

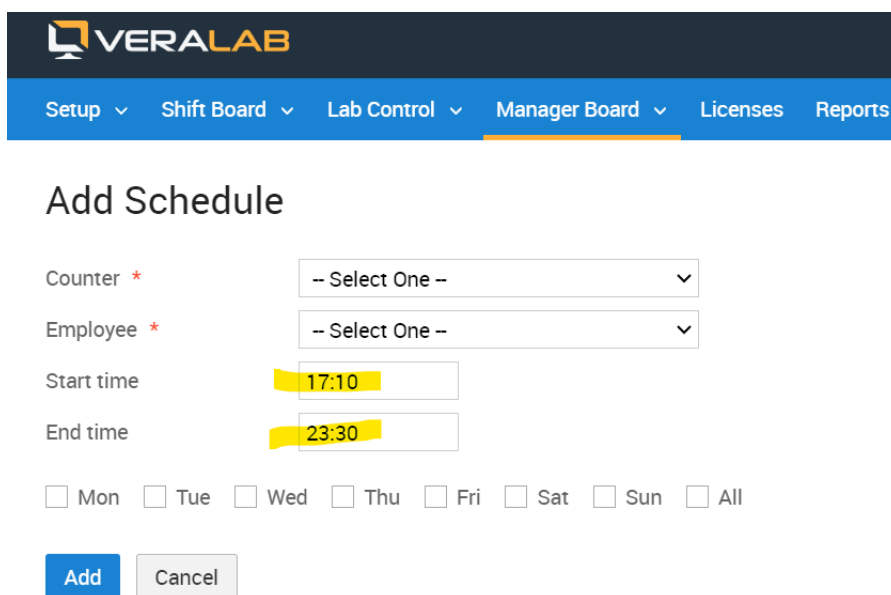

The screenshot shows the VeraLab interface with a navigation bar containing: Setup, Shift Board, Lab Control, Manager Board, Licenses, Reports, Issues, Student Portal, Booking, and Tools. Below the navigation bar is the heading "Edit Localization Settings". A table with two columns, "Name" and "Value", contains the following entries:

Name	Value
Time Format	24-hour
First Day of Week	Monday

At the bottom of the form are two buttons: "Update Settings" and "Cancel".

- Modifications to time fields for easier data entry. Entering 1710 in a time field will automatically convert to 17:10. If AM/PM format is used (see Localization Settings), entering 1710 will automatically convert to 5:10 PM.

The screenshot shows the VeraLab interface with a navigation bar containing: Setup, Shift Board, Lab Control, Manager Board, Licenses, and Reports. Below the navigation bar is the heading "Add Schedule". The form includes the following fields:

- Counter * (dropdown menu: -- Select One --)
- Employee * (dropdown menu: -- Select One --)
- Start time (text input: 17:10)
- End time (text input: 23:30)

Below the time fields are radio buttons for days of the week: Mon, Tue, Wed, Thu, Fri, Sat, Sun, and All.

At the bottom of the form are two buttons: "Add" and "Cancel".

- Extended Unicode support for emojis.

Current Time Is : 06-Aug-2024 1:44

Notes: Had to leave early due to family emergency 😊

Buttons: Start Shift, End Shift

Excel icon

Current Pay Period Shifts for admin:

	Shift Started	Shift Ended
	06-Aug-2024 1:44	
Total		

- Minor UI changes in Shift Scheduling module.
- Retention of custom JVM size during upgrade. Version 9.2.0 sets JVM size to 1024Mb when it detects that VeraLab version that is being upgraded has a lower value of JVM. If a customer has setup JVM size to a higher value, it will retain custom value.
- Customers with Enterprise Edition license only. If a user is assigned to more than one Department, only Site Administrator can update such user record. Previously any user with Users task could cross-department users. This fix is intended to increase application security.

Updates in Booking Module

VeraLab version 9.2.0 has the following enhancements in Booking Module. Booking Module license is required to unlock these features.

- Start Booking Now feature allows making immediate computer reservations.
- Enhanced Booking email templates allowing customizing email subject and bodies.

Tech Stack Updates

VeraLab version 9.2.0 comes embedded with the following updated tech stack components.

- Tomcat 9.0.93
- JDK 17.0.10
- Postgres 14.11

Bug Fixes

VeraLab version 9.2.0 includes minor bug fixes discovered in previous releases.

- Fixed a bug in Windows clients preventing from taking screenshots of non-primary displays in multi-display configurations.
- Fixed a bug in multi-display configurations preventing from locking all monitors.

Reporting a Bug

Found a bug? Please submit a bug to support@veralab.com.

Thank you for using VeraLab and for taking the time to send us your feedback!
